Experience

Data Scientist, November 2020-Present
Aspirus Health, Wausau, WI

- Provide data and analysis to identify improvement opportunities for hospital/clinic operations
- Create Qlik applications for stakeholders to view, explore and analyze data
- Built R Shiny applications to explore scenarios and business impact

Advanced Analytics Modeler, December 2019-October 2020
Sentry Insurance, Stevens Point, WI

- Building Python-based text mining application for extracting claim information
- Implemented machine learning models from text data in R
- Wrote complex SQL queries to extract data from various sources
- Create dashboards to drive business insight and decision making
- Use multivariable modeling to appropriately price insurance products

Biostatistician, June 2017-December 2019
Cleveland Clinic, Cleveland, OH

- Built and automated an appointment no-show prediction system tailored to operability
- Built statistical/machine learning models for clinical outcomes using EHR (Epic) data and other sources
- Developed Shiny-based web applications for clinical risk prediction models
- Wrote complex SQL queries to extract accurate EHR data utilizing the UMLS
- Consulted with pharmaceutical companies on EHR-based health outcomes research projects
- Contributed in writing statistical methods sections for grants and manuscripts
- Caregiver Excellence Award, 2018-Q2

Skills

General

Concurrent project management, communication of project specifications and results, automating processes/workflows, collaboration and leadership

Technical

R (package author/maintainer, tidyverse, ggplot, shiny); SQL; Python (pandas, spaCy); QlikSense; Java; data cleaning, manipulation, visualization; building statistical workflows; text analysis, regular expressions

Methodology

Regression modeling (GLM's, GEE's, mixed models), survival analysis, machine learning (random forest, gradient boosting machines, neural networks), natural language processing (NLP)

Education

M.S. in Statistics, 2017
University of Iowa
Iowa City, IA

- Major GPA: 3.93

B.S. in Statistics, 2015
UW-La Crosse
La Crosse, WI

- Major GPA: 3.91
- Minor: Computer Science

Projects

- R package for Naive Bayes' document classification with Java backend
- Gibbs' sampler in Python
- Custom database language in Java with a hash index and random access files

Coursework

applied statistics, statistical inference, computer intensive statistics, machine/statistical learning, model selection, sports statistics, bayesian statistics, applied time series, nonparametric statistics, categorical data analysis, database management, software design (Java), calculus I-III, linear algebra
